

PRODUCT RECALL

IMPORTANT NOTICE

**Product Name:**

4-Gang Mains Extension Cable with RCD

Brand: PRO-ELEC**Model:** PELB1648**CPC Code:** PL10044**The reported issue:**

We have identified a serious defect affecting a small number of units in this batch. Due to the wiring in the 13A plug/RCD assembly being incorrectly connected, any exposed **metal parts** of connected equipment can become 'live'. **This presents an electric shock hazard, which could lead to electrocution.**

Action to take:

If the 13A plug/RCD assembly is plugged into a power socket, **immediately** switch the socket off (if the socket has a switch) and remove the plug from the power socket. **Do not touch equipment connected to the extension lead until this has been done.**

Check the batch label (usually on the reverse):

If the batch number '**22 11 28**' is present, as indicated in the photo above, your product may present a shock hazard and must be recalled

Please contact us urgently by emailing customersupport@cpc.co.uk, or calling **03447 880088** to arrange a collection, replacement (or refund).

No other batches of this product (or any other cable reel) are affected by this recall. We apologise for any inconvenience and appreciate your cooperation
